

BASICS and BEYOND
An Introduction to Implant Dentistry

With Cadaver Hands-on

Workshop (3 days)

Date 29th 30th Nov - 1st Dec 2019

Venue Sydney Eye Hospital

8 Macquarie Street Sydney, NSW 2000

Speaker

Dr. LOUIE AL-FARAJE

*Diplomate, American Board of Oral Implantology
Diplomate, International Congress of Oral Implantologists
Fellow, American Academy of Implant Dentistry
Founder of California Implant Institute &
Novadontics*

Dr. Sonny Cheung (Sydney) *"A great in-depth course hosted by DIO with Dr. Al-Faraje. An intensive three day lecture and one day hands-on cadaver course had covered lateral window sinus lift and block grafting procedures in depth. The practical hands-on cadaver course was an invaluable experience like no other courses on animal specimens could compare. I highly recommend this to anyone who are keen to learn more about implant dentistry"*

Dr. David Bassal (Central Coast) *"Couldn't recommend or rate this course any higher...World class speakers with a strong focus on the application of case by case dental surgery through thorough yet simplified classification, diagnosis and possible complications. Gained valuable knowledge that I have been able to immediately apply in my implant surgery. Thank You DIO!"*

Dr. Jack Yang (Sydney) *"Another great course hosted by DIO with Dr. Louie Al-Faraje. This course was catered for someone who has placed several implants and wanting to excel further in implant dentistry. Compare to some courses out there, simply using pig or goat head, the feel of slicing, cutting and grinding, its just not the same."*

Dr. Jonathon Ng (Brisbane) *"Great Course, would recommend to any one wanting to pick up advanced skills in implant dentistry"*

Lecture

Day One

8.30 – 9.00	Registration
9.00 – 10.30	Welcome (Introduction and orientation) Implant terminology Classification of implant prostheses
10.30 – 10.45	Coffee break
10.45 – 12.30	Bone density. Force factors. Implant healing.
12.30 – 1.30	Lunch
1.30 – 3.30	Step by step surgical implant placement (one-stage & two-stage protocols) Video Surgery (<i>Three posterior implant placements using lab fabricated surgical guide</i>)
3.30 – 3.45	Coffee break
3.45 – 5.30	Hands – on models surgical training

Day Two

9.00 – 10.30	Vertical and Horizontal restorative spaces Optimal implant positioning
10.30 – 10.45	Coffee break
10.45 – 12.30	Optimal implant positioning Continue
12.30 – 1.30	Lunch
1.30 – 3.30	Surgical Anatomy for basic implant surgery Video Surgery (<i>Mental foramina and alveoloplasty</i>)
3.30 – 3.45	Coffee break
3.45 – 5.30	Socket Grafting Video Surgery (<i>Animation and video surgical demonstration of the socket grating</i>)

Day Three
